

P1 PROTECT

A Well Architected Data Protection Service

AIR-GAPPED

Operates outside of your organization's network and security sphere.

IMMUTABLE

Cannot be tampered with, by anyone, inside or outside your organization.

COMPLIANT

Proactively demonstrate compliance with a clear and accessible audit trail of all data protection events.

FULLY AUTOMATED

Secured, maintained, updated, and operated through codified and repeatable processes.

COHESITY

A Well Architected Data Protection Service

The Game Has Changed

Traditional approaches to data protection that are not explicitly architected to ensure recoverability from ransomware are no longer effective.

The key to combating ransomware attacks

is a data protection solution that is air-gapped and immutable. P1 Protect, a comprehensive Data Protection as a Service (DPaaS) offering, is deployed outside of your organization's authentication and security sphere with immutable copies that cannot be tampered with by anyone.

Although the market's flooded with Backup as a Service (BaaS) offerings that allow customers to offload infrastructure management, they don't cover the day to day operations, monitoring, and reporting required to ensure recoverability. To address this gap, we tapped into our experience designing and deploying data protection solutions for some of the largest media and healthcare organizations in the world, and built P1 Protect.

FULL COVERAGE

VMs, DBs, NAS, EC2, RDS, S3, M365, SFDC, and more.

Whether it runs in the cloud or in your DC, P1 Protect has you covered.

CLOUD OR DC

Deploy in your DC or Colo to minimize RTO, in the cloud to maximize simplicity, or get the best of both worlds with a hybrid solution.

UPFRONT OR MONTHLY

Purchase a full year of service upfront at a discounted rate, or if OpEx is preferred, pay a fixed rate each month.

P1 Protect is a wholistic solution that includes **design, deployment, problem resolution, reporting,** and **backup & recovery operations**, so all of your data protection needs are completely covered.
